

ATMPLINTH

KEY FEATURES

- » Height adjustable 50mm-550mm
- » Reduces ATM installation times
- » Suits all ATM types
- » Proven track record
- » Extremely cost-effective

The Universal ATM Plinth ensures rapid installation, relocation and removal of all ATM models.

The patented telescopic design permits assembly in minutes within a huge height range with no wasted components, while micro-fine adjustment allows for extremely uneven floors. The plinth can be adjusted whilst the ATM is attached, thus negating manual handling issues and allowing the advantage of transportation via pallet truck. These factors allow quick installation and dramatically reduce site times and associated costs.

Micro fine adjustment »
