SECURITYFIXINGKIT

The ATM Security Fixing Kit ensures the ultimate protection against the forced removal of ATM's. It will compliment your existing security strategy to provide a physical barrier to ATM theft.

The ATM Security Fixing Kit allows ATM's to be located in any location without the fear of vehicular attack. It is designed to prevent any angle of attack, lift or pull. Compatible with all ATM makes and models, the kit can be concealed from public view within the footprint of the machine, or deliberately positioned to draw attention to the protection offered.
